CHOWLY

Maples Bar & Bistro

Google Search Ads, week one after the reservations rebuild. Oct 14 to Oct 21, 2026.

$0
spent on clicks from outside the US (was 13.5% of spend)

38
clicks on "Reserve a Table"

226
clicks, all from people in your area

$40
spend for the week, same budget as before

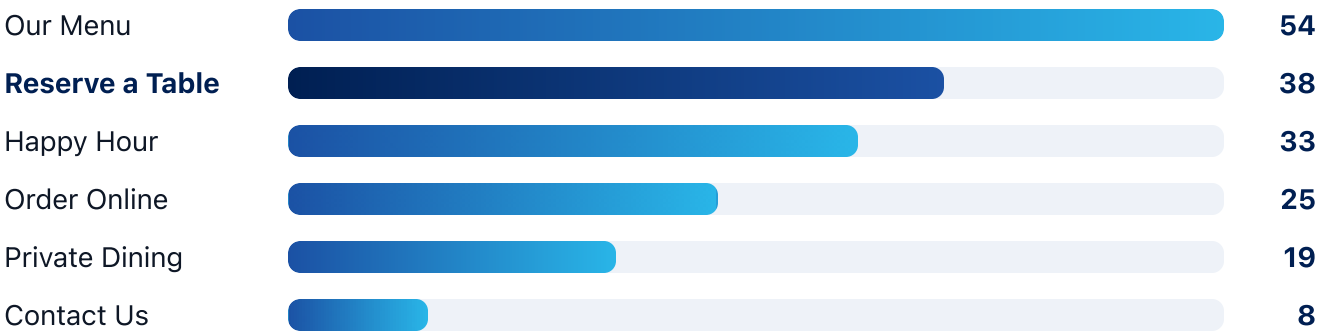

What we changed on Oct 13 and 14

You told us reservations matter more than carryout, so we rebuilt the campaign around booking a table.

- The main ad now leads with reservations and opens your OpenTable page
- Ads only show to people physically near Novi, in English
- Blocked searches for competitors and cuisines you don't serve
- Added a tap-to-call button to every ad
- Ads run from 7am until close, not overnight
- Replaced 3 links that were sending people to your homepage

Where people clicked

Links shown under the ad, Oct 14 to 21. Reserve a Table is the second most clicked, and Order Online keeps carryout available to people searching your name.

The week before vs. the week after

Same budget, fewer clicks. The clicks that dropped off were coming from outside your area, from people searching for other restaurants, and from overnight hours. Each click now costs a little more because it comes from a real local diner.

	OCT 6 TO 13	OCT 14 TO 21
Spend	$38.80	$40.26
Clicks	339	226
Click rate	1.89%	2.05%
Cost per click	$0.11	$0.18
Phone calls from ads	2	2, plus 3 tap-to-call
Spend outside your area, on competitors, or overnight	Yes	$0

What's next

OpenTable bookings don't report back to Google, so your cover counts are how we'll measure the reservations push.

Mid-November: a full 30-day before and after review of the campaign.

From you: OpenTable covers for September, and again for November, so we can compare.
